PRODUCT DATASHEET

PEI676USB

PEI676USB

(600241)

The TETRA PEI-interface PEI676 is connected to the SUB-D socket of WTC676 [600076] and establishes a connection between an inserted MTP850 and the PC. With this connection to the PC this allows to programm the radio directly in the Car Kit.

Connections: USB , SUB-D
